Cancer Behavioral Research Faculty Position  
Associate / Full Professor (Tenure Track)

In a joint recruitment effort, the Department of Epidemiology and Biostatistics, Institute for Health Promotion Research (IHPR) and the Cancer Therapy and Research Center (CTRC) at the University of Texas Health Science Center in San Antonio (UTHSCSA) invites applications for a tenure-track faculty position in behavioral science at the associate or full professor level with experience and extramural research funding history in Latino related cancer prevention and control, cancer health disparities and community based participatory research.

Institute for Health Promotion Research and the Cancer Therapy and Research Center: The IHPR, established in 2006 as a unit of the Department of Epidemiology and Biostatistics at UTHSCSA, directs many research projects that address chronic disease and cancer prevention and control research. http://ihpr.uthscsa.edu. The CTRC is one of four National Cancer Institute (NCI)-designated Cancer Centers in Texas and the only NCI-designated center in South Texas, serving a 38-county region of 4.4 million people. (www.ctrc.uthscsa.edu).

The research activities at the IHPR, CTRC, and their host institution (UTHSCSA) provide varied and exciting opportunities for behavior research studies. The successful candidate will have the opportunity to collaborate closely with faculty from other UTHSCSA schools (i.e., Medical, Dental, Nursing, and Allied Health), the UT School of Public Health’s San Antonio Regional Campus, and UTHSCSA’s Regional Academic Health Center campuses in Harlingen and McAllen, Texas, located on the U.S.-Mexico border.

Qualifications: 1) completed doctoral degree (M.D. or Ph.D. equivalent); 2) track record of independent, peer-reviewed grant funding; 3) record of peer-reviewed publications in the area of cancer and behavioral sciences; 4) ability to serve as principal investigator on externally funded projects and as co-investigator with multi-disciplinary research teams; and 5) contribution to the educational mission through teaching and advising graduate students and/or mentoring early-career scientists.

Candidate Review: Review of applications will begin immediately and continue until the position is filled. Candidates should e-mail a letter describing their qualifications and interests along with their curriculum vitae, and contact information for three professional references to:

Amelie G. Ramirez, Dr.P.H.  
Chair, Behavioral Faculty Search Committee  
Director, Institute for Health Promotion Research  
7411 John Smith Drive, Suite 1000  
San Antonio, Texas 78229  
210-562-6500

All Faculty appointments are designated as security sensitive positions. The University of Texas Health Science Center at San Antonio is an Equal Employment Opportunity/Affirmative Action Employer.
Faculty Position in Cancer Disparities

The Department of Cancer Prevention and Population Sciences at the Roswell Park Cancer Institute is seeking applications for a faculty position at the level of Assistant or Associate Member to develop a strong research base in disparities as it relates to cancer (Behavioral, Intervention, Epidemiologic, Clinical Trials, Health Services or Community-based Research). This faculty position will work within the Office of Cancer Health Disparities Research.

The mission of the Office of Cancer Health Disparities Research, led by Deborah O. Erwin, PhD, is to improve our understanding of and reduce disparities in Western New York, and contribute to the science and methods related to the study of these disparities. We are searching for candidates who will advance the knowledge base toward eliminating disparities in the prevention and treatment of cancer; endeavoring to understand social and other determinants of racial/ethnic disparities in the burden of cancer, and rigorously evaluating interventions directed to reducing these disparities. Candidates should have direct experience working with medically underserved and/or NIH underrepresented racial/ethnic communities.

Applicants must have a doctoral degree in Social Sciences, Psychology, Behavior Science, Health Promotion/Education, Community Health, Public Health, or other relevant field. Applicants should demonstrate experience in the application of research methods in community-based cancer control research as well as a commitment to multi-disciplinary, collaborative work. Successful candidates should also demonstrate experience in transdisciplinary cancer and behavioral research related to health disparities. Preference will be given to candidates with a strong record of peer-reviewed publications and competitive funding.

One of the top goals of the Office of Cancer Health Disparities Research is to enhance diversity among faculty, staff and students. We are committed to recruiting culturally diverse faculty and students of the highest caliber. Roswell Park has a long history of being committed to equal employment opportunity for all, regardless of race, national origin, color, creed, religion, sex, age, disability, veteran status, sexual orientation, gender identity, or associational preference.

Roswell Park Cancer Institute is a free standing cancer institute, with collaborating clinicians and basic scientists dedicated to cancer research, providing numerous opportunities for productive inter-disciplinary research. Buffalo and Western New York provide an outstanding venue for easy living and high quality of life. There is a vibrant arts and theatre scene, unparalleled architecture, beautiful countryside within 20 minutes of downtown Buffalo, major league sports and possibly one of the best restaurant cultures in the country, due to the area’s ethnic diversity.

Roswell Park Cancer Institute is an Equal Employment/Affirmative Action Employer. Women and minorities are encouraged to apply.

Interested candidates should send a letter describing their qualifications and interests, curriculum vitae, a copy of two scholarly works, and contact information for three references to:

Electronic applications may be sent to alicia.tuyn@roswellpark.org

A National Cancer Institute-designated Comprehensive Cancer Center • A National Comprehensive Cancer Network Member
A Blue Distinction Center for Complex and Rare Cancers™
Medica Research Institute Research Opportunity—Epidemiologist Researcher: The Medica Research Institute, established in 2010 as an 'academic-like' setting of investigator-driven health services research, is seeking accomplished individuals with a documented publication record in the following areas: Health behavior and promotion, epidemiologic methods, population health, health disparities / health equity, social and environmental determinants of health, and behavioral risk factors.

Our research agenda is composed of three main themes: Consumer Engagement, Healthy Communities and Health Care Delivery. Our mission is to conduct research that generates valid and meaningful evidence-based information for timely translation into activities that promote health and improve lives for all populations.

Qualifications: Must possess a terminal degree (Ph. D.), requiring a research based thesis in public health, epidemiology, or health services research, and a minimum of 5 - 7 years of experience as a scientific investigator on research grants or contracts. Individuals should have a proven track record of securing public funding to conduct their research, serving as principal investigator and/or co-investigator on their most recently funded projects. Strong skills in research design and quantitative methods. To learn more, contact: Mina Oz turk, Sr. Recruiter at 952-992-2056 or visit: http://MedicaResearchInstitute.org AA/EOE

Boston University School of Public Health invites scholars to apply for the position of Assistant Professor or Associate Professor or Professor in its dynamic and growing Department of Community Health Sciences (CHS). Department of CHS Faculty study and teach about public health problems in the context of social and cultural factors. The faculty's current research program includes studies of public health problems that emerge from individual ("lifestyle") behaviors, interpersonal influences, and institutional, community, and cultural forces; health disparities; obesity prevention; mental health and substance use issues; health literacy and communication; sexual health; the design and implementation of programs and policies to improve health conditions; rigorous experimental and evaluation research; and mixed-methods and community-based participatory research. The Department was formed in 2009 by merging the departments of Social & Behavioral Sciences and Maternal & Child Health, areas that define concentrations for MPH student study. The department’s educational program includes the MPH and DrPH degrees. Our education programs focus on teaching the skills of community health science: community assessment, intervention design and evaluation, program management, policy, advocacy and communication, as well as research and practice in the areas of women's, children's, and adolescent health, sexual health and reproductive justice, interpersonal violence, and unhealthy alcohol and other drug use.

Candidates must have a PhD or equivalent degree in public health, social and behavioral sciences, maternal and child health, or related fields. We seek candidates who have demonstrated outstanding scholarship through publication and show potential for securing external funding or have secured it, and who are also committed to teaching excellence and student mentorship. Specialty areas could include any of the areas above. We are committed to increasing the diversity of our faculty. Therefore, applicants from underrepresented demographic groups are encouraged to apply.

Screening of applications will begin immediately and will continue until the positions have been filled. Interested candidates should send a curriculum vitae, the names and contact information for three references, and a statement addressing current and future research interests and teaching experience. The cover letter (no more than 3 pages) should briefly describe the candidate's research, teaching, mentorship, and public health practice experience. Materials should be submitted to: Drs. Michael Siegel and Lois McCloskey, Co-chairs, CHS Faculty Search Committee, Department of Community Health Sciences, Boston University School of Public Health, 801 Massachusetts Avenue, Fourth Floor, Boston, MA 02118 or emailed to Ms. Karen Smith, Department Administrator, kmsmith9@bu.edu.

Boston University is an equal opportunity employer. We encourage applications from women and minorities.
Two Faculty Positions Open

Ponce School of Medicine and Health Sciences

The Ponce School of Medicine and Health Sciences (PSMHS) is a fully accredited (Middle States, Liaison Committee Medical Education, Council of Higher Education), private, bilingual center of higher education located in the southern coastal city of Ponce, Puerto Rico. PSMHS has a thriving and dynamic research program that is currently undergoing a period of aggressive growth, especially in cancer research. PSMHS currently has a U54 NCI-funded partnership with the H. Lee Moffitt Cancer Center in Tampa, FL. This U54 PSMHS/Moffitt Partnership encompasses several collaborative activities between both institutions, including the development of cancer research projects, student and faculty exchanges, career development programs and community outreach activities. PSMHS has a Ph.D. program in Biomedical Sciences, and state-of-the-art Animal Research Facilities, as well as Imaging, Molecular, Cell Culture, Tissue Biobanking and Cancer Core facilities. PSMHS was founded 35 years ago. It is located in Ponce, a historical city on the southern coast of the island of Puerto Rico. Ponce is approximately 70 miles/100 kilometers from the capital city of San Juan, it is the tropical island’s second largest urban center with many cultural activities and close to important natural/ecological reserves.

POSITION #1: BASIC SCIENCE CANCER RESEARCHER

The Department of Physiology, Pharmacology and Toxicology at the Ponce School of Medicine and Health Sciences (PSMHS) invites applications for a full-time faculty position at the Assistant Professor level. We are seeking individuals with either a Ph.D., M.D., or M.D., Ph.D. degrees and postdoctoral research experience. The successful candidate will be expected to develop a basic or translational, independent, multidisciplinary research program with focus on cancer. She/he will also be expected to develop research collaborations with our clinical faculty and with basic cancer researchers from PSMHS and the H. Lee Moffitt Cancer Center.

POSITION #2: COMMUNITY OUTREACH CANCER RESEARCHER

The Clinical Psychology and Basic Sciences Programs at the Ponce School of Medicine and Health Sciences (PSMHS) invite applications for a full-time faculty position at the Assistant Professor level. We are seeking individuals with a Ph.D., DrPH, or equivalent degree, and postdoctoral research experience. The successful candidate should be experienced in public health, health education, and basic epidemiology, and will be expected to develop close research collaborations with the Community/Outreach component under the U54 PSMHS/Moffitt Partnership. He or she is expected to develop a basic or translational, independent, multidisciplinary research program with focus on cancer. She/he will also be expected to develop research collaborations with our clinical faculty and with basic cancer researchers from PSMHS and the H. Lee Moffitt Cancer Center.

Applicants for both position’s should have a publication record and grant funding commensurate with their level of academic experience, and will be expected to teach in departmental team-taught courses, as well as participate in U54-sponsored Mentoring and Career Development programs for junior
Faculty. A competitive start-up package is offered.

Review of candidates will begin immediately and will continue until the position is filled. Applicants should send a Curriculum Vitae, including names and addresses of three references, and a statement of research and career goals to: Mrs. Hannia Delgado, Program Manager, U54 Cancer Partnership, Ponce School of Medicine and Health Sciences, P.O. Box 7004, Ponce, Puerto Rico 00732-7004, e-mail: hdelgado@psm.edu

Internal Medicine Faculty Position
Department of Clinical Services
Florida State University, College of Medicine

Position:
The Florida State University College of Medicine (FSUCOM) invites interested individuals to apply for a full-time faculty position*, open rank, for an academic internist in the Department of Clinical Sciences. A generalist is preferred, although individuals with subspecialty training in rheumatology, endocrinology or infectious diseases with primary focus in an outpatient/consultative practice would be considered. This individual will be intimately involved in general educational activities for medical students in an integrated curriculum at the Central campus in Tallahassee.

Additional responsibilities include:

- Substantial teaching and supervision of general internal medicine residents while staffing the outpatient clinics of the FSUCOM Internal Medicine Residency Program located at Tallahassee Memorial Hospital. Tallahassee Memorial HealthCare, with an award-winning 772-bed acute care hospital has the seventh largest hospital in Florida with a medical staff of over 570 physicians, spanning over 50 specialties and including certified Stroke, Chest pain and Comprehensive Community Cancer Care centers
- The ability to foster an educational environment conducive to patient-centered, resident and student education and to integrate his/her role as a College of Medicine Faculty while working at TMH and with community physicians are key factors for this position.
- The individual must demonstrate evidence of experience and/or excellence in medical education of students and residents.
- Scholarly interest and experience in outpatient/community-based clinical and/or health outcomes research is highly desirable.
- Applicants must have professional goals which are consistent with the mission of this community-based medical school, as described on our website http://med.fsu.edu/

Requirements:

- A medical degree
- Completion of an ACGME-approved Internal Medicine residency program and current Board certification by the American Board of Internal Medicine.
- The individual must possess and/or be eligible for licensure in the State of Florida and federal DEA certification and have either United States Citizenship or Permanent Resident status.
Post-Doctoral Positions

The University of Pennsylvania's Tobacco Center for Regulatory Science, and the Annenberg School for Communication offer two two-year post-doctoral fellowships in tobacco communication research beginning as early as Summer 2014. This fellowship program offers training in communication research and theory as well as opportunities to become involved in ongoing research. The advanced, rigorous training and experience provided will prepare fellows for careers as independent investigators.

The Fellows will obtain skills and experience to complement previous advanced work in communication, tobacco control, public health, or behavioral science. Fellows can work closely with mentors in such areas as content analysis of social media, behavioral theory, persuasion theory, risk and decision-making, psychophysiology as well as health communication. Fellows will participate in research using survey, experimental, and content analytic methods and will receive guidance in the preparation of manuscripts and career development grants. The current research portfolio focuses on communication and tobacco use, including prevention and cessation message development and campaigns, and media effects on tobacco use. Fellows will work under the supervision of Joseph Cappella, Ph.D. Gerald R. Miller Professor of Communication, or Robert Hornik, Ph.D, Wilbur Schramm Professor of Communication, and other faculty in health communication.

Applicants must have training in quantitative social science or behavioral research methods and must have received a PhD or an equivalent degree from an accredited institution. If applying, include a letter of introduction, CV, and names and contact information for 3 references. Applications will be considered on a continuing basis. To be assured of full consideration please respond by March 1, 2014. Please forward materials to hcrfellow@asc.upenn.edu. To obtain additional information, please call or contact Joseph Cappella, Ph.D (215-746-3400.), Gerald R. Miller Professor of Communication, Annenberg School for Communication, University of Pennsylvania, 3620 Walnut Street, Philadelphia, PA 19104.
